Logistic Operator

Mercado Libre - Buenos Aires, Argentina

jun 2019 – nov 2019

I worked as a logistics operator performing the following tasks within the warehouse:

- Preparing packages.
- Item picking.
- Item storing.
- Detection of defective items.
- Load transport through the warehouse.

IT Assistant

Mercado Libre - Buenos Aires, Argentina

nov 2019 – jan 2021

I developed different tasks to start training in the IT world. The tasks I did were:

- Develop tools with scripts within the Google ecosystem.
- Creation of publications to give visibility of the developments to users.
- Develop of new features to existing APIs.
- Bug detection and fixing.

Software Backend Developer

Mercado Libre - Buenos Aires, Argentina

jan 2021 – present

I develop tasks related to the creation, improvement, maintenance and user support for Python, Go and Java processes used in different business units.

The used technologies used in my day to day are:

- BigQuery: Creation of queries to obtain and transform data both from the console and the API.
- AWS S3: Integration with APIs and scripts to host and process files.
- Google API: Process integration with the Google ecosystem to interact between the different solutions provide.
- Other internal applications to create and maintain ETL processes.

Also, I receive and solve user's inquiries using tools like ServiceDesk and Jira.
