AGUSTÍN BASILE

Another technology enthusiastic trying to change the world, one line at a time. I believe that the future in written in source code. The problem can sometimes seem to be impossible to solve, but I have the knowledge and talent required to make just about anything.

WORK EXPERIENCE

Software Developer • Mercado Libre

Buenos Aires, Argentina • January 2021 – Present

I develop tasks related to the creation, improvement and maintenance of Python, Go and Java backend projects oriented to microservices, as well as frontend projects based on React. The used technologies used in my day to day are:

- BigQuery and Teradata: Creation of queries to obtain data, make reports and API integration in different solutions.
- Cloud Engineering: Use of different AWS services such as S3, integrating the solutions with APIs and scripts to perform the necessary tasks.
- Google API: Integration with different applications to make automatizations in a variety of Google tools (Docs, Sheets, Drive, etc.).
- Creation and maintenance of ETL processes using tools like Pentaho and internal tools. Automations on office tools using Google Script and VB.
- Also, I receive and solve user's inquiries using tools like Jira and monitor the applications through OpsGenie.

IT Assistant • Mercado Libre

Buenos Aires, Argentina • November 2019 – January 2021

I developed different tasks to start training in the IT world. The tasks I did were:

- Develop tools with scripts within the Google ecosystem.
- Creation of publications to give visibility of the developments to users.
- Develop new features to existing APIs.
- Bug detection and fixing.

Logistic Operator • Mercado Libre

Buenos Aires, Argentina • June 2019 – November 2019

I worked as a logistics operator performing the following tasks inside the warehouse:

- Preparing packages.
- Item picking.
- Item storing.
- Detection of defective items.
- Load transport through the warehouse.

Internship • ENEL

Buenos Aires, Argentina • June 2018 – November 2018

I took part in an internship to finish my technical studies in which I developed a data loading suite in Visual Basic using Microsoft Excel as a database. This information was later used in different company units.
